Nodus Technologies is the market leader in the electronic payment processing sector, providing comprehensive solutions that eliminate redundancy and inefficiency related to credit card processing.

**With the rapid-fire pace of e-Commerce**, you can't afford to be held up by slow transaction processing. Disjointed credit card processes, disconnected systems, and error-prone manual data entry impede your pace, and your business. Speed and simplify web orders and electronic payment processes with integrated credit card processing solutions from Nodus Technologies, Inc.

**In today's speedy e-Commerce world, time is money.** To keep up with the pace of plastic, you need to eliminate the invisible barriers that slow you down. Whether you're recording orders from a Web storefront, processing and approving payments from a credit card terminal, or wrapping up reconciliation, poor integration and loose connectivity can be unsurpassable speed bumps.

With numbers bouncing back and forth between card terminals, Web storefronts, and accounting solutions - and between approval, billing, and shipping - you risk putting your numbers through double or triple-entry. Error-ridden numbers resulting from disparate systems lead to unsatisfactory customer service ratings, sticky reconciliation issues, and ultimately, serious threats to your bottom line.

Don't get caught between the number crossfire. Connect your credit card processing to your accounting solution-and create a seamless electronic payment pathway so you can move your numbers through smoothly and accurately.

**Nodus Technologies' ePayment processing solutions**, Credit Card Advantage and eStore Advantage, integrate with Microsoft® Business Solutions-Great Plains to ensure smooth, fast, and accurate data transfer. The superior integration and flexibility of these e-Commerce solutions enable you to integrate Web orders and electronic payments with multiple payment gateways, processors, and back office environments.

The pains of credit card processing involve transporting transaction data from card swipe machines to accounting solutions and back again during reconciliation - a lengthy process riddled with mistakes and painstaking details. Credit Card Advantage simplifies the way ePayments are processed by integrating with a range of front and back office applications and eliminating the potential for human errors stemming from manual data entry.

# Credit Card Advantage: Simplifying, Speeding Credit Card Transactions

**Credit Card Advantage** delivers a powerful, flexible, and secure internet-based credit card solution that enables you to verify credit card payments over the web in real-time. Process your electronic credit card payments seamlessly when you can automatically record information in the general ledger, generate automatic credit card receipts, process transactions immediately or save them for batch verification, view details of prior transactions, set up multiple merchants, and more.

- **Streamlined Transaction Management:** Receive fast, accurate verification of electronic payments in seconds and manage electronic payments efficiently, effectively, every time. Choose whether to charge immediately or pre-authorize and book payments to be charged upon shipment.
- **Advanced Detailed Reporting:** Create your own multi-query reports with summaries, detail settlements, and daily transaction reports grouped by credit card type to streamline reconciliation with bank statements.
- **Superior Customer Service:** With detailed and complete customer information only a keystroke away, you can drill down and access historical reporting to answer customer questions on demand.
- **Quick, Trouble-free Implementation:** Start verifying information from sales transaction screens in little as 30 minutes.

# eStore Advantage: Streamline Your Business and Automate Web Orders

Handling orders initiated from a Web storefront can be a long, tedious, and inefficient process that usually involves a disjointed chain of people for processing credit card information, authorizing credit card approval, and creating invoices.

**eStore Advantage** creates a fluid electronic payment process by connecting your Web store directly to Great Plains so you can automate web orders, improve operational efficiency, and increase net margins. Enter new order and account information directly into Great Plains, post payment and sales order data in real-time, and accept multiple payment types and origination points.

With eStore Advantage, you can process and submit web orders quickly and easily, eliminating double-entry errors and freeing resources previously dedicated to manual order processing.

- **Seamless Integration between your eStore and Great Plains:** Communicate transaction details and vital information seamlessly between your Web storefront and your back office applications, eliminating manual entry of credit card information and streamlining workflow.
- **Efficient Transaction Management:** Streamline order acceptance process and keep up-to-date transaction records when you can create detailed online receipts with line item details and in-house records for each transaction.
- **Fast, Secure Credit Card Approvals:** Reduce approval time with seamless transaction data transfer directly to your back office system-initiate communication with payment gateway to secure authorization for sales orders, capture funds and transfer data back to Great Plains for increased productivity and reduced overhead.
- **Streamlined Order Processing:** Efficiently create and modify sales orders and cash receipts, better manage inventory items, and gain detailed visibility over customer information.
