

SBM ADVANTAGE

Speed and Simplify Your Credit Card Processing

SBM Advantage delivers a powerful, flexible, and secure internet-based credit card solution that enables you to verify credit card payments over the web in real-time. This solution seamlessly integrates with Microsoft® Business Solutions - Small Business Manager to provide an open architecture that readily supports the addition of payment gateways and diverse business environments.

Connected Convenience: The Ultimate Credit Card Advantage

Credit Card Advantage for Small Business Manager connects your credit card processing with your accounting solution for fast, efficient management of electronic payments. Numbers are pushed through a secure, seamless pathway and recorded in your general ledger automatically eliminating the potential for human errors and delays associated with disconnected systems.

SBM Advantage speeds and simplifies credit card processing from the instant a card is swiped to end-of-the-month reconciliation. Faster approval times and automatic data transfer to your accounting solution increase productivity, reduce overhead, and streamline operations.

Efficient Transaction Management: Receive fast, accurate verification of electronic payments in seconds and efficiently manage electronic payments. SBM Advantage creates a fluid electronic payment process between your credit card processing and your accounting solution for smooth, accurate data transfer at each transaction. Choose whether to charge immediately or pre-authorize and book payments to be charged upon shipment.

Advanced Detailed Reporting: Create your own multi-query reports with summaries, detail settlement and daily transaction reports grouped by credit card type to streamline reconciliation with bank statements. Robust reporting dramatically reduces time spent reconciling credit card transactions and frees your resources for other essential business processes.

Exceptional Customer Service: With detailed and complete customer information only a keystroke away, you can drill down and access historical reporting to answer customer questions on demand. Equip customer service representatives with the information necessary to deliver consistent customer service and ensure a high level of customer satisfaction.

Quick, Simple Implementation: Start verifying credit card information from sales transaction screens in as little as 30 minutes. Tight integration with multiple payment gateways, processors, and back office environments promises flexible, reliable credit card processing from your first transaction on.

PRODUCT FEATURES:

- ✓ Quick and easy "Plug-In" integration with multiple processors and payment gateways.
- ✓ Customer credit card verification in real-time or batch mode with printed receipts.
- ✓ The choice to charge customers immediately or easily reserve payments to be charged upon shipment.
- ✓ Automation of partially filled orders and back ordered items purchased on credit cards.
- ✓ Processing with any Great Plains sales transaction screen (RM, Cash Receipts, SOP, and Invoicing Modules).
- ✓ Automatic tracking of expiring and pending pre-authorizations and reserved payments.
- ✓ Seamless integration with Encore Business Solutions – Recurring Contract Billing
- ✓ Seamless integration with Kairos – Agora Management Series
- ✓ And more!

Get Up-to-Speed with Your ePayment Processing

With the rapid-fire pace of e-Commerce, you can't afford to be held up by slow transaction processing. Disjointed credit card processes, disconnected systems, and error-prone manual data entry impede your pace, and your business. Speed and simplify web orders and electronic payment processes with integrated card processing solutions from Nodus Technologies.

In today's speedy e-Commerce world, time is money. To keep up with the pace of plastic, you need to eliminate the invisible barriers that slow you down. Whether you're recording orders from a Web storefront, processing and approving payments from a credit card terminal, or wrapping up reconciliation, poor integration and loose connectivity can be unsurpassable speed bumps.

Nodus Technologies' credit card processing solution, Credit Card Advantage, integrates with Microsoft® Business Solutions-Small Business Manager to ensure smooth, fast, and accurate data transfer. The superior integration and flexibility of this solution enables you to integrate orders and electronic payments with multiple payment gateways, processors, and back office environments.

SBM ADVANTAGE

Companies today need a system for accepting credit cards that is fast, secure, and reliable. SBM Advantage offers fast, accurate verification of electronic payments in a matter of seconds, providing the missing piece that connects your credit card processing to your accounting solution, in a secure environment. Our proven software ensures you manage electronic payments efficiently and effectively, every time.

Whether you want to charge customers immediately, or pre-authorize and book payments to be charged upon shipment - SBM Advantage's flexible features make transaction management easy!
