

eCOMMERCE ADVANTAGE

Streamline Your Business and Simplify Your Credit Card Processing

eCommerce Advantage creates a fluid electronic payment process by connecting your eCommerce-based website directly to Great Plains so you can automate web orders and improve operational efficiency. eCommerce Advantage delivers a powerful, flexible, and secure internet-based ePayment solution which seamlessly integrates with Microsoft® Business Solutions - eCommerce.

Seamless Integration with Microsoft® Business Solutions - Great Plains

Need to establish multiple merchant accounts? Want to accept credit cards, debit cards, electronic checks, and ACH payments directly on your eCommerce website? eCommerce Advantage is designed to give you the flexibility to do everything from charging an order instantly, to reserving funds in eCommerce that will be charged upon shipment. Providing fast, secure, and reliable Internet-based verification, this solution integrates seamlessly with Microsoft® Business Solutions - Great Plains so your eCommerce website is constantly updated with payments processed in your sales modules.

Streamlined Transaction Management: In this dynamic market, companies need tools that increase productivity and eliminate errors. The ability to effectively manage increasing volumes of back-end data and capture and process customer payments quickly and effectively ensures organizations stay ahead. Nodus Technologies developed eCommerce Advantage to improve all aspects of electronic payment processing. By minimizing the time spent on redundant activities, this dynamic solution enables companies of all sizes - from small businesses to large enterprises - to optimize electronic payment functionality and communication from an eCommerce-based website to the Microsoft® Business Solutions - Great Plains accounting system.

A Complete Solution: eOrder Advantage simplifies everything from establishing and maintaining merchant accounts to the initiation, verification, and processing of payments. eOrder Advantage includes both Transact Advantage and Credit Card Advantage in one complete solution, giving you powerful customer service tools and comprehensive reporting to facilitate reconciliation of bank deposits.

Quick, Simple Implementation: Start verifying credit card information from sales transaction screens in as little as 30 minutes. Tight integration with multiple payment gateways, processors, and back office environments promises flexible, reliable credit card processing from your first transaction on.

PRODUCT FEATURES:

Working in conjunction with Transact Advantage and Credit Card Advantage, this comprehensive front- to back-end credit card processing solution improves all aspects of ePayment management. Features include:

- Credit card authorization (Sale) and delayed-authorization & capture (Book) from eCommerce web site.
- Credit card verification from all Dynamics/eEnterprise Sales data entry screens
- Real Time verification
- Batch mode verification
- Complete multi-user capability
- Numerous processors to choose from
- Web-base design eliminates modem problems
- And More!

Get Up-to-Speed with Your ePayment Processing

With the rapid-fire pace of e-Commerce, you can't afford to be held up by slow transaction processing. Disjointed credit card processes, disconnected systems, and error-prone manual data entry impede your pace, and your business. Speed and simplify web orders and electronic payment processes with integrated card processing solutions from Nodus Technologies.

In today's speedy e-Commerce world, time is money. To keep up with the pace of plastic, you need to eliminate the invisible barriers that slow you down. Whether you're recording orders from a Web storefront, processing and approving payments from a credit card terminal, or wrapping up reconciliation, poor integration and loose connectivity can be unsurpassable speed bumps.

Nodus Technologies' credit card processing solutions, Credit Card Advantage and Transact Advantage, integrate with Microsoft® Business Solutions-eCommerce to ensure smooth, fast, and accurate data transfer. The superior integration and flexibility of this solution enables you to integrate orders and electronic payments with multiple payment gateways, processors, and back office environments.

eCOMMERCE ADVANTAGE

eCommerce Advantage allows users to process credit card payments directly from the eCommerce-based website. It's a complete solution that permits users to verify payments over the web and updates the Great Plains back office database all at once. It works in conjunction with Credit Card Advantage (CCA), letting users further process sales transactions submitted through their eCommerce-based website from within the Great Plains environment. Credit Card Advantage is included with eCommerce Advantage and is seamlessly integrated with each of the main sales modules. Credit cards can be processed individually in real-time mode or saved to a batch for efficient bulk processing.
