

eORDER ADVANTAGE

Streamline Your Business and Simplify Your Credit Card Processing

eOrder Advantage creates a fluid electronic payment process by connecting your eOrder website directly to Great Plains so you can automate web orders and improve operational efficiency. eOrder Advantage delivers a powerful, flexible, and secure internet-based ePayment solution which seamlessly integrates with Microsoft® Business Solutions - eOrder to provide an open architecture that readily supports the addition of payment gateways and diverse business environments.

Seamless Integration with Microsoft® Business Solutions - Great Plains

Need to establish multiple merchant accounts? Want to accept credit cards, debit cards, electronic checks, and ACH payments directly on your eOrder website? With eOrder Advantage, it's a snap. This solution is designed to give you the flexibility to charge an order instantly, or reserve funds in eOrder that will be charged upon shipment. Additionally, seamless integration with Microsoft® Business Solutions - Great Plains means your eOrder website is constantly updated with payments processed in your sales modules.

Streamlined Transaction Management: Today's marketplace demands that companies be responsive. Organizations accomplish this by capturing and processing customer payments quickly and effectively while managing increasing volumes of data on the back end. To assist with all aspects of electronic payment transaction management, Nodus Technologies developed the eOrder Advantage suite. At once powerful and easy-to-use, this complete solution helps companies of all sizes – from small businesses to large enterprises – optimize electronic payment functionality and communication from an eOrder-based website to the Microsoft® Business Solutions - Great Plains accounting system.

A Complete Solution: eOrder Advantage simplifies everything from establishing and maintaining merchant accounts to the initiation, verification, and processing of payments. eOrder Advantage includes both Transact Advantage and Credit Card Advantage in one complete solution, giving you powerful customer service tools and comprehensive reporting to facilitate reconciliation of bank deposits.

Quick, Simple Implementation: Start verifying credit card information from sales transaction screens in as little as 30 minutes. Tight integration with multiple payment gateways, processors, and back office environments promises flexible, reliable credit card processing from your first transaction on.

PRODUCT FEATURES:

Working in conjunction with Transact Advantage and Credit Card Advantage, eOrder Advantage streamlines transaction management, providing a comprehensive front- to backend credit card processing solution. Features include:

- Automatic transfer of pre-authorized funds with partially fulfilled orders, support for back orders, and auto renewal of pre-authorized funds.
- The use of Transact Advantage COM API to initiate credit card payments from the eOrder-based website, process those transactions through the appropriate payment gateway, and post verification information to Microsoft® Business Solutions - Great Plains environment.
- Tight integration with Credit Card Advantage to enable users to process transactions from within the Microsoft® Business Solutions - Great Plains environment then automatically update payments on the eOrder website.
- And more!

Get Up-to-Speed with Your ePayment Processing

With the rapid-fire pace of e-Commerce, you can't afford to be held up by slow transaction processing. Disjointed credit card processes, disconnected systems, and error-prone manual data entry impede your pace, and your business. Speed and simplify web orders and electronic payment processes with integrated card processing solutions from Nodus Technologies.

In today's speedy e-Commerce world, time is money. To keep up with the pace of plastic, you need to eliminate the invisible barriers that slow you down. Whether you're recording orders from a Web storefront, processing and approving payments from a credit card terminal, or wrapping up reconciliation, poor integration and loose connectivity can be unsurpassable speed bumps.

Nodus Technologies' credit card processing solutions, Credit Card Advantage and Transact Advantage, integrate with Microsoft® Business Solutions-eOrder to ensure smooth, fast, and accurate data transfer. The superior integration and flexibility of this solution enables you to integrate orders and electronic payments with multiple payment gateways, processors, and back office environments.

eORDER ADVANTAGE

eOrder Advantage allows users to process credit card payments directly from the eOrder website. It's a complete solution that permits users to verify payments over the web and updates the Great Plains back office database all at once. It works in conjunction with Credit Card Advantage (CCA), letting users further process sales transactions submitted through their eOrder website from within the Great Plains environment. Credit Card Advantage is included with eOrder Advantage and is seamlessly integrated with each of the main sales modules. Credit cards can be processed individually in real-time mode or saved to a batch for efficient bulk processing.
